

Color Choices

Damac offers a variety of color choices for our products. All colors are available in our durable epoxy powder-coat finish. All products listed on-line come standard in our black finish. If you desire one of our other available color choices simply change the color code to the desired finish. Alternate color choices are available free of charge.

In addition to our six standard finishes, we also offer custom colors. If you require a unique color finish, please contact the factory with your request and a color catalog will be sent to you.

How to change colors:

sample part#: CCO84EDB | SBSV-3

replace (-3) w/ desired color number

- 1 Putty
- 2 Blue
